FOREWORD

The present special report on Canada's trade with British Empire Countries and the United States has been issued for the use of the Imperial Economic Conference, 1932. It covers the essential facts in detail as well as in general outline down to the fiscal year ended March 31, 1932.

The outstanding feature shown in recent years has been the gradual increase in the proportion of the Dominion's trade, both import and export, transacted with Empire Countries. In the fiscal year 1930 the proportion of the total imports into Canada from Empire Countries was 20·2 per cent, and from Foreign Countries 79·8 per cent, but in 1932 the proportion from Empire Countries was 25·6 per cent, and that from Foreign Countries 74·4 per cent. As for exports, in 1930 the proportion to Empire Countries was 33·9 per cent and to Foreign Countries 66·1 per cent, but in 1932 the proportion to Empire Countries was 38·0 per cent and that to Foreign Countries 62·0 per cent.

The trade of Canada with the United States is shown in detail in view of the effect of the proximity of the United States to Canada on the trade relations of the two countries. Canada for years found an excellent market in the United States for her raw materials and semi-manufactured products, while on the other hand the United States found a remunerative market for her manufactured products in Canada. The enactment of the Emergency Tariff Act in May, 1921, followed about a year later by the Fordney-McCumber Tariff Act, proved an insuperable barrier to the shipment of many Canadian farm products to the United States, while the passage of the Smoot-Hawley Tariff Act in 1930 practically closed the market in the United States to Canadian farm products. In view of these enactments, Canada has been compelled to seek markets overseas for her exportable surplus of farm and other products. The trade of British countries, more especially of the overseas Dominions and some of the British Crown Colonies, expanded rapidly in volume and in value during the period of stable prices in the nineteen-twenties, indicating enormous potentialities for the future when relatively stable prices shall have been restored.

In this report Tables Nos. I and III present a conspectus of Canada's trade, both import and export, as well as the proportion of the trade expressed in percentages with each principal unit of the British Empire and with the United States, year by year, from the fiscal year 1932 back to 1911, and prior to 1911 for each five-year period back to 1886; while Table No. II shows for each principal unit of the Empire and for the United States for the fiscal years 1930 and 1931; (1) Imports under the various tariffs, and (2) Imports and exports according to degree of manufacture. Table No. IV sets forth in rather complete detail the imports into Canada from each principal unit of the Empire and from the United States for the fiscal year 1932; also the group and sub-group totals for the years 1932, 1931, 1930, 1929, 1926, 1922 and 1914; while Table No. V presents similar data respecting Canada's exports also in rather complete detail for the same countries and for the same years.

A survey of Canada's imports from and exports to Empire Countries and the United States, according to degree of manufacture, indicates that the imports from the United Kingdom consist mainly of fully manufactured products (89·5 per cent); from Australia, fully manufactured products (70 per cent); and of semi-manufactured products (15·2 per cent); from British East Indies, of fully manufactured products (90 per cent); from the Irish Free State, of fully manufactured products (98 per cent); and from New Zealand, fully manufactured products (61 per cent) and of semi-manufactured products (27 per cent). From other Empire Countries imports consist chiefly of raw materials and semi-manufactured products. Canadian imports from the United States consist of fully manufactured products (66 per cent), raw materials (28 per cent), and semi-manufactured products (6 per cent).

Canada's exports to Empire Countries (except the United Kingdom) consist chiefly of fully manufactured products. Exports to the United Kingdom consist of raw materials (61 per cent), fully manufactured products (30 per cent), and semi-manufactured products (9 per cent); and while the exports to the United States consist of fully manufactured products (46 per cent), semi-manufactured products (28 per cent) and raw materials (26 per cent).

While in 1931 Canada's imports of fully manufactured products amounted to about 90 per cent of her total imports from the United Kingdom, her exports of fully manufactured products made up about 30 per cent of her total exports to the United Kingdom. Similarly, while 66 per cent of the imports from the United States consisted of fully manufactured products, the amount of fully manufactured products exported from Canada to the United States made up about 46 per cent of her total exports to that country. The statistics in the following table amplify the above analysis.

PERCENTAGE OF IMPORTS FROM AND EXPORTS TO EMPIRE COUNTRIES AND THE UNITED STATES ACCORDING TO DEGREE OF MANUFACTURE
(Years ended March 31, 1930 and 1931)

Countries	Imports according to Degree of Manufacture						Exports according to Degree of Manufacture

The table shows that the proportion of the total value of imports from the United Kingdom and the United States which consisted of fully manufactured products was 69.2 per cent in 1930 and 68.5 per cent in 1931. The proportion of the total value of exports to the United Kingdom and the United States which consisted of fully manufactured products was 42.6 per cent in 1930 and 44.2 per cent in 1931.

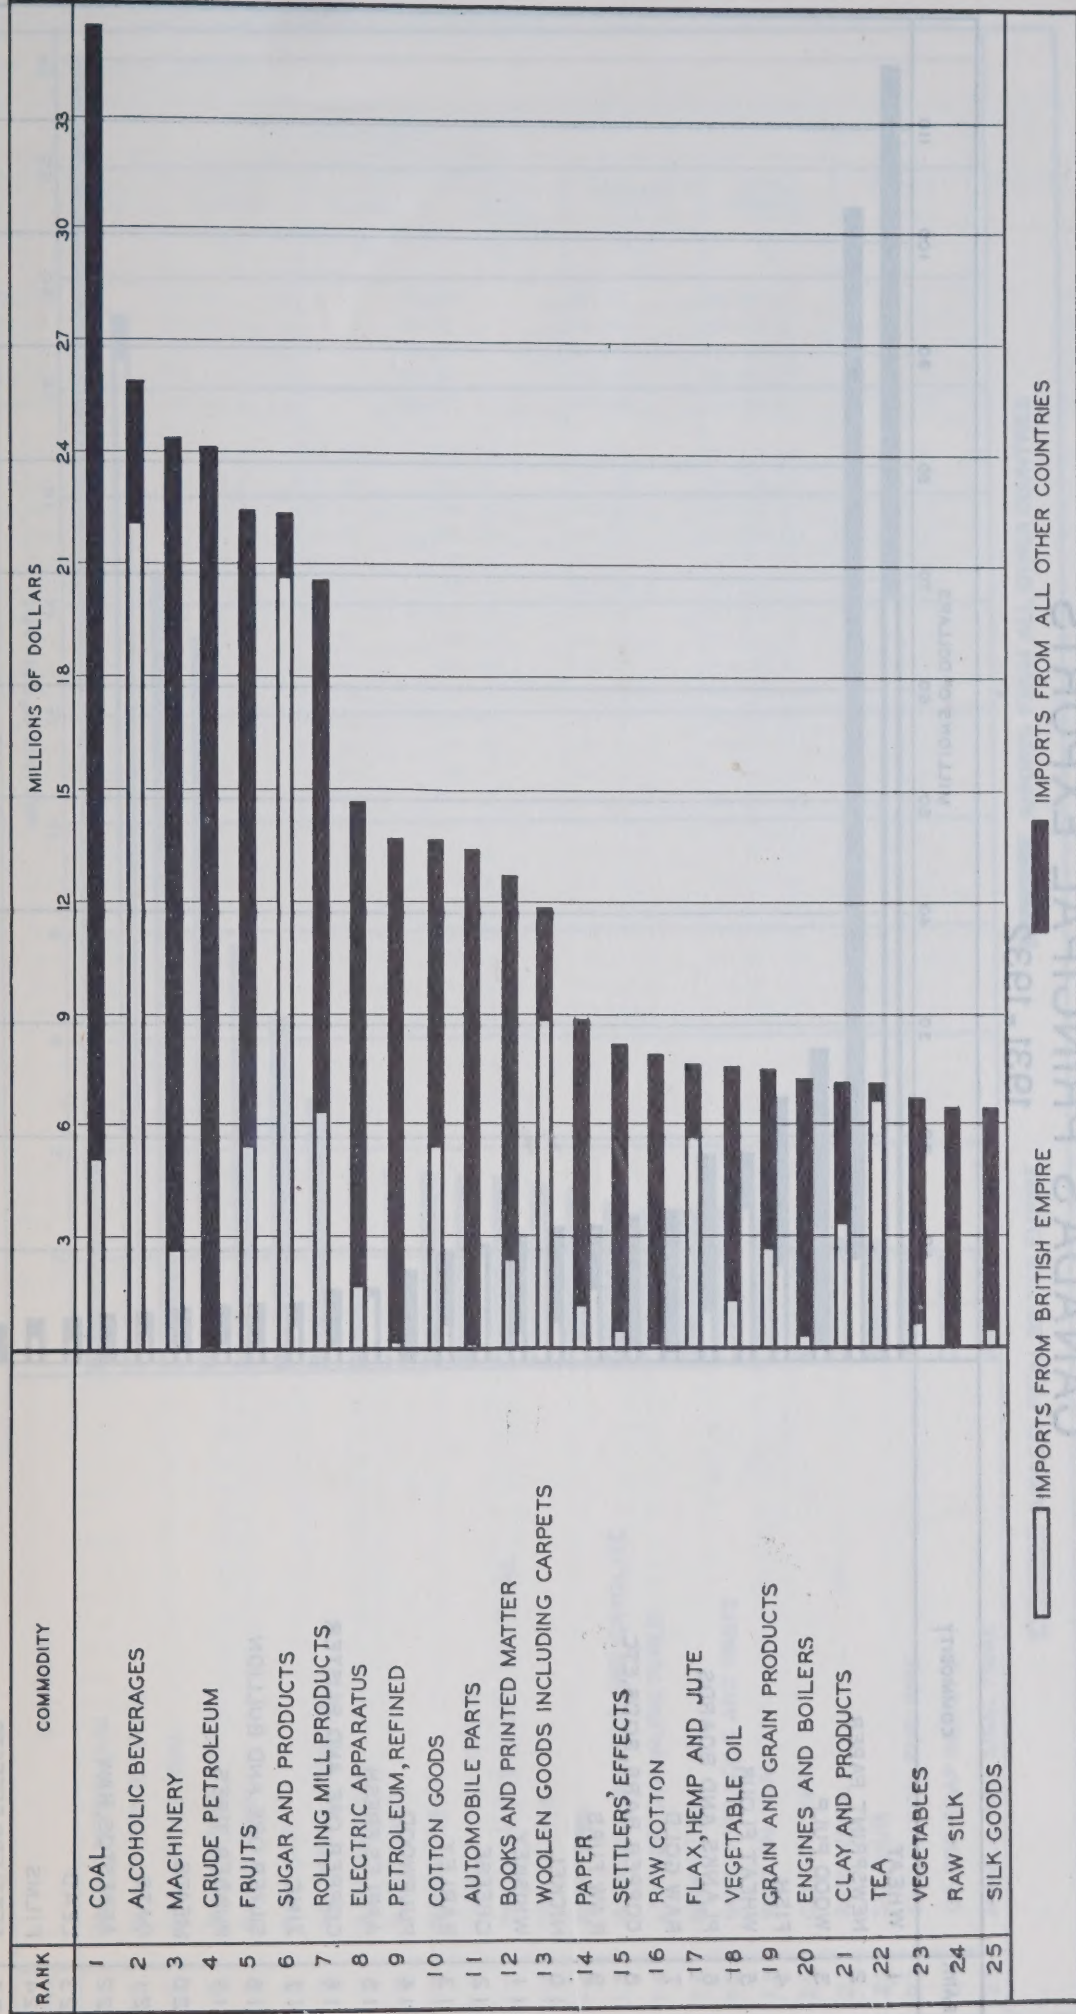

The table also shows that the proportion of the total value of imports from the United Kingdom and the United States which consisted of raw materials was 23.1 per cent in 1930 and 23.9 per cent in 1931. The proportion of the total value of exports to the United Kingdom and the United States which consisted of raw materials was 19.0 per cent in 1930 and 17.8 per cent in 1931.

The table also shows that the proportion of the total value of imports from the United Kingdom and the United States which consisted of semi-manufactured products was 7.7 per cent in 1930 and 7.6 per cent in 1931. The proportion of the total value of exports to the United Kingdom and the United States which consisted of semi-manufactured products was 17.8 per cent in 1930 and 17.8 per cent in 1931.

The table also shows that the proportion of the total value of imports from the United Kingdom and the United States which consisted of fully manufactured products was 69.2 per cent in 1930 and 68.5 per cent in 1931. The proportion of the total value of exports to the United Kingdom and the United States which consisted of fully manufactured products was 42.6 per cent in 1930 and 44.2 per cent in 1931.
